

(a) CIs width for $\alpha = 0.025$ and $N = 100$ simulations

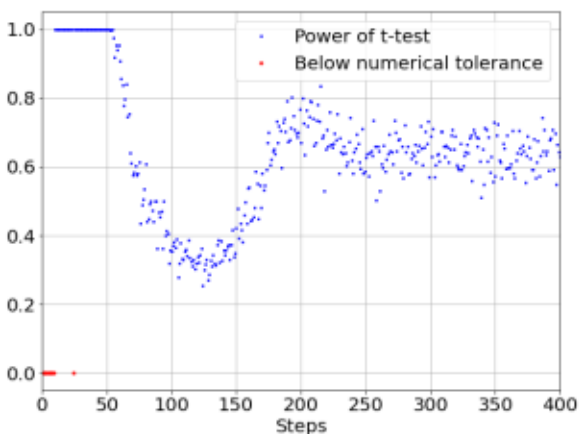

(b) CIs width for $\alpha = 0.025$ and $\delta = 0.5$

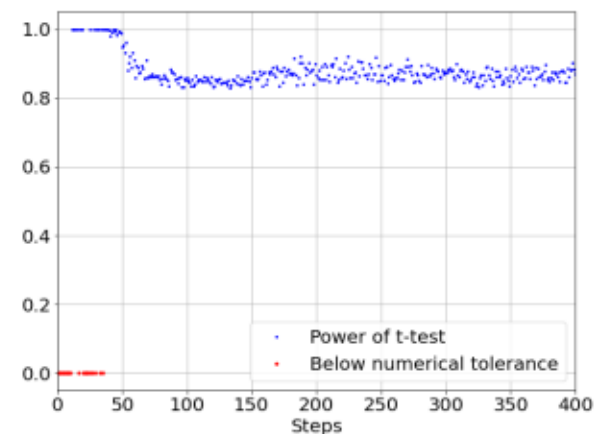

(c) T-test are means in (a) point-wise equal? - significance $\alpha_w = 0.025$

(d) T-test are means in (b) point-wise equal? - significance $\alpha_w = 0.025$

(e) Power of t-test in (c) for difference $\varepsilon = 0.5$

(f) Power of t-test in (d) for difference $\varepsilon = 0.5$
